

## Final Project

- design + present a web site for a non-profit or small business

### Chef's Playground Eatery

- It is now the 11<sup>th</sup> of August and my flight East is on the 20<sup>th</sup>. Which means I have 9 days to write, test, edit and present this project. Time to for the final stretch.

### 3 Similar Sites (re: similar business nature)

- Britannia Brewing Steveston + everything on one page
  - Clean and organized appearance, food menu could be better integrated to fit w/ the style instead of a fit embedded object
- Blue Canoe
  - the layout is very over-complicated. Too many navbar options, Footer grabs too much attention, scrolling effect for background images/ header is distracting. There is no proper consistency to the website's style. A restaurant website should be simple and straight to the point.
- Steveston Pizza
  - website style, colour and aesthetic is consistent across all pages (Mandarin/Cantonese language option is a nice touch as well).
  - The two large buttons on the index page do seem somewhat out of place.

### 3 Downloadable Sites (download free components for your project)

- Bootstrap (for JS + Icons)

- Fontawesome

- Google Fonts

- Drive

PSD templates?

WordPress templates?

### 3 Sites for Technical Information

- W3

- MDN

- Stack Overflow
